Addition word problems

It's Earth Awareness Day and the town of Flora is celebrating by planting trees in areas where the forest has been damaged.

1. Mayor Fauna, leader of the town of Flora, donated 27 oak tree seedlings and 16 seedlings of holly. How many seedlings did he donate altogether?

2. Mr. Fortree, a businessman also gave seedlings for the tree planting activity. If he gave 14 seedlings of cedar and 38 seedlings of pine, how many seedlings did he give in total?

3. 14 students from Flora Middle School (FMS) were asked to participate in the event. They planted 47 apple trees and 27 orange trees in the forest near their school. How many trees in total did the students plant?

4.   Rangers from Flora Natural Park and Wildlife Reserve also joined the activities on that day. They planted 75 redwood trees and 25 cypress trees to replace the trees that were destroyed during a recent forest fire. How many trees did the rangers plant?

5.   Professor Treehead of the Flora University requested his students to participate. He said that they planted 15 types of trees in the natural park, 20 types of trees in the neighboring forest and 10 species of trees all around different locations in town. Write an equation showing how many types of trees were planted by the students?

Answers

1. 27 + 16 = 43
    Mayor Fauna donated 43 seedlings.

2. 14 + 38 = 52
    Mr. Fortree gave a total of 52 seedlings.

3. 47 + 27 = 74
    The students planted 74 trees in total.

4. 25 + 75 = 100
    The rangers planted 100 trees.

5. 15 + 10 + 20 = 45
    There were 45 species of trees planted by the students.
